 4. Whorls must be shown thus 'X' and described below in detail.

Head: _____

Neck: _____

Limbs: L.F. _____

R.F. _____

L.H. _____

R.H. _____

Body: _____

Acquired Marks/Brands: _____

Height: _____ (Hands) _____ (cms) With/Without Shoes.

Bone: _____ (Inches) _____ (cms)

Girth: _____ (Inches) _____ (cms)

The Property of (Name & Address): _____

At (Place of Examination): _____ Date: _____

The examination is carried out substantially in accordance with the standard procedure recommended by the R.C.V.S and the B.V.A. (Joint Memorandum on the Examination of Horses 1976 revised 1985). The examination is set out in three stages:

1. Preliminary examination.
2. In-hand exercise.
3. Second trot up and foot examination.

Evidence of any disease or defect should be assessed with regard to these permanently rendering the animal unsuitable for breeding. Each animal should be qualified with pertinent comments. "Satisfactory" is acceptable as a minimal opinion.

1. Preliminary Examination

- a. Conformation: The Conformation is entirely a matter for the breed society. However, conformation which is potentially deleterious or detrimental to athletic ability or durability should be recorded and discussed.

b. Head _____

c. Neck _____

d. Limbs L.F. _____

R.F. _____

L.H. _____

R.H. _____

e. Body _____

2. In-Hand Exercise

Action at the walk and trot on a hard level surface. _____

Turning in the horse's own length and trotting away. _____

Backing. _____

Distal limb flexion tests. _____

3. Second Trot up and Foot Examination

Note. This external examination does not include any special techniques other than:

- i. Blood typing.
- ii. Blood samples for non-normal nutrients.

At the examining veterinary surgeon's request other special techniques such as endoscopy, radiography, ultrasonography and haematological examinations may be used.

Special techniques and findings performed: _____

I found no clinical signs of disease, injury of physical abnormality which may render the above horse permanently unsuitable for stud purposes other than recorded above. In my opinion this horse is clinically free from conformation defects currently thought to be hereditary.

This clinical examination is not such as to determine this horse's athletic ability and durability with particular regard to such diseases or injuries which might compromise these.

Veterinary Surgeon's name _____ (BLOCK CAPITALS)

Address _____

Veterinary Surgeon's signature _____ Date of signature _____

I certify that the above horse has not been administered any non-normal nutrients within the previous three weeks.

Owners name _____ (BLOCK CAPITALS)

Address _____

Owner's signature: _____ Date of signature _____

DIRECTIVES FOR VETERINARY SURGEONS

The enclosed certificate is in respect of a stallion/mare, which the owner required to be inspected at his/her own expense.

You are requested to determine whether the stallion/mare is affected by disease or conformation defects, which would render it unsuitable for breeding. Please see enclosed veterinary standards relating to the approval of stallions.

Should the animal inspected be affected by any one of the conditions to an extent rendering you unable to certify that it is suitable for breeding purposes, please return the unsigned certificate with a statement specifying the reasons.

PLEASE FILL IN COMPLETELY.

I am/am not the veterinary surgeon who normally attends this animal.

I have/have not attended this animal in respect of lameness in any limb in the last twelve months.

I have/have not prescribed phenylbutazone.

**IF YOU HAVE ATTENDED THIS ANIMAL PLEASE GIVE DETAILS BELOW,
IN FULL WITH TREATMENT.**

--

I have/have ~~not~~ treated this animal for any wind defect in the last twelve months.

I, THE UNDERSIGNED, CERTIFY THAT I HAVE IDENTIFIED AND EXAMINED THE HORSE DESCRIBED ON THE ATTACHED CERTIFICATE. I FIND THE ANIMAL SUITABLE FOR BREEDING PURPOSES.
